

Dear Randolph School Community,

The health and safety of students and our school community are always our first priority. In that regard, we are mindful of the concerns surrounding the Coronavirus (COVID-19).

The school is closely monitoring international and national advisories from the [World Health Organization](#) (WHO), the U.S. [Centers for Disease Control and Prevention](#) (CDC), and staying in close contact with the local health department. We are also in close contact with our travel partners and are monitoring Travel Advisories published by the U.S. Department of State, as they might impact travel plans during Interim.

As we focus on precautionary measures at school, we are encouraging families to partner with us to help maintain a healthy school environment. Please follow these [CDC recommendations](#) for personal precautionary measures to prevent illness.

In the event that circumstances warrant a closure, we would strive to deliver instruction, guidance and materials, where appropriate, through our learning management systems, MyRandolph and Canvas.

This is an evolving situation and I will provide periodic updates as we learn more about the potential concerns around the Coronavirus (COVID-19) and our school. Thank you for partnering with us as we work together for the health and safety of our school community.

Sincerely,

Jerry B. Beckman  
Interim Head of School
